

**$\chi_{c1}(4274)$**  $I^G(J^{PC}) = 0^+(1^{++})$ was  $X(4274)$ 

This state shows properties different from a conventional  $q\bar{q}$  state.  
 A candidate for an exotic structure. See the review on non- $q\bar{q}$  states.

Seen by AAIJ 17C in  $B^+ \rightarrow \chi_{c1} K^+$ ,  $\chi_{c1} \rightarrow J/\psi \phi$  using an amplitude analysis of  $B^+ \rightarrow J/\psi \phi K^+$  with a significance (accounting for systematic uncertainties) of  $6.0 \sigma$ .
